

# “Build Your New Pool

## Breakthrough Technology

The RenoSys FuturaPool was developed after decades of commercial pool construction experience as a refinement and dramatic improvement over conventional pool construction. The FuturaPool offers remarkable advantages such as; a patented one-piece brace assembly, the durability of a PVC clad laminated stainless steel wall system and the breakthrough integration of pool construction technologies. FuturaPool is the ideal choice for the affordable new construction of any public pool where long term durability is a primary consideration. FuturaPool is also an ideal system to specify when an owner desires to have a local general contractor partner with an experienced proven aquatic system manufacturer such as RenoSys. FuturaPool offers dramatically lower life cycle maintenance costs and carries a 25 year interior surface warranty and a 50 year pool wall warranty.

## FuturaPool™ Applications:

- Municipal Pools
- Competitive Pools (FINA Compliant)
- Zero Depth and Wave Pools
- Therapeutic Pools (see also our moveable floor)
- YMCA, Club, Hotel and Light Commercial Pools
- High School & University Pools

# Right From The Start”™

## Summit Series™ Stainless Steel Pools & Spas

The Summit Series represents the state of the art in engineered pool construction technology. Featuring a fully-welded 304 or 316 Stainless Steel vessel that is available in any imaginable interior finish including: a natural stainless finish, ceramic tile or a RenoSys PVC Pool Shell. Our in-house 30,000 square foot stainless steel manufacturing facility and our decades of experience in manufacturing metallic pools has resulted in engineered pools and spas that are custom designed to meet your specific project conditions and timeline. All Summit Series Pool projects are engineered, professionally manufactured, and are both static and pressure tested to assure a completely leak free project and carry a full 10 year warranty.

All projects are available with a custom factory assembled and tested, skid mounted, SummitPac Mechanical Package. These pre-plumbed and pre-wired mechanical packages are factory assembled, and tested to minimize in-field labor costs and delays.

## Summit Series™ Applications:

- In-Ground Public Pools
- Therapy Pools
- Hydrotherapy Spas
- High Rise Hotels, Condos and Apartments
- YMCA, JCC and Fitness Clubs
- Country Club Pools
