

Get the Floor that Performs! (Wet or Dry)

RecDeck™ PVC Flooring

RecDeck's non-abrasive, slip-resistant textured yet comfortable surface makes it an ideal flooring solution for pool decks, weight rooms, exercise rooms, locker rooms, and wherever a tough, watertight, cushioned surface is needed. Because of its UV inhibitors and unique properties, RecDeck can stand up to the most extreme weather climates and is virtually unaffected by most pool and maintenance chemicals.

RecDeck may be used in conjunction with a RenoSys PVC Pool Shell to create the appearance of a completely new pool facility with a single bonded membrane of leak proof PVC from the walls all the way to the pool main drain.

Features:

- **Durable & Long Lasting** – Covered with an 85 mil thick membrane of PVC and is warranted for 5 years with a life expectancy of approximately 10 years.
- **Watertight** – Totally watertight for use on indoor or outdoor applications.
- **Slip-Resistant** – Independently certified to standard ASTM 1028c as a slip-resistant surface for either dry or wet conditions.
- **Colorfast** – RecDeck maintains its attractive color.
- **UV Stabilized** – Maximum UV inhibitors are incorporated during the manufacturing process.
- **Algae and Fungus Resistant** – Biocides are formulated into the PVC material.
- **Low Maintenance** – RecDeck can be mopped, pressure-washed or sponge-cleaned.
- **Resilient** – Stands up to the most extreme weather conditions and virtually eliminates common deck problems such as delamination, cracking, flaking, fading, or peeling.

*Installed over
1/4" foam backing*
